Assistance Tools for Construction Stormwater General Permits

Resources for small businesses and local governments that can help them comply with construction stormwater permits.

Stormwater runoff from construction activities can have a significant impact on water quality. As stormwater flows over a construction site, it picks up pollutants like sediment, debris, and chemicals, and deposits them in creeks, streams, rivers, lakes, etc. The Stormwater Permitting Program requires operators of construction sites that disturb one or more acres of land to obtain permit coverage.

The TCEQ <u>Small Business and Local Government Assistance</u> section developed the following tools to help construction-site owners and operators comply with stormwater permitting requirements. The documents on this page are in various file formats (help downloading files).

Tools

- Construction General Permit, TXR150000 12
- Steps to Obtain Construction Permits for Storm Water Discharges (RG-436)
- Delegation of Signatories to Reports W
- SWP3 Worksheets W and Instructions 1
- Rainfall Erosivity Calculator 12
- 🔹 Erosion Control Best Management Practices 🔀
- Home Owner Transfer Notice 12
- Low Erosivity Calculator
- Common Plan of Development
- Best Management Practices Database
- Latitude and Longitude Exit.
- Atlas of Texas Surface Waters (GI-316)
- Texas 303(d) List of Impaired Waters 1
- Edwards Aquifer Requirements—If construction is taking place over the Recharge, Contributing or Transition Zone of the Edwards Aquifer, additional requirements may apply.
 - Edwards Aquifer Brochure (RG-011)
 - Edwards Aquifer Map Viewer
